

APPLICATION TO THE NEBRASKA PUBLIC SERVICE COMMISSION
300 THE ATRIUM, 1200 N STREET
LINCOLN, NE 68509-4927

For Authority to Construct, Operate and Maintain Electric Transmission Lines

Application of _____, _____,) NPSC Docket No. _____
Nebraska, for authority to construct operate)
and maintain an electric transmission line) Applicant's Case No. _____
in _____ County(ies), Nebraska.)
Check if delayed application _____

1. Comes now, _____, whose principal office or place of business is _____, and hereby applies to the Nebraska Public Service Commission, in accordance with the statutory provisions of the Revised Statutes of Nebraska, 1943, as amended, for a permissive order authorizing the construction, operation and maintenance of electric transmission line(s) having a voltage in excess of 700 volts and outside the limits of an incorporated city or village.
2. Applicant requests an order authorizing the construction, installation, operation and maintenance of poles, towers, wires, anchors, guy wires, cables, conduits, transformers, switches, and all necessary appurtenances and apparatus over, under, upon, along or contiguous to the public highways, public grounds or private right-of-way on and over route shown on the route map, Exhibit "A," and in accordance with the specifications, Exhibit "B," hereto attached and made a part of this application.
3. The route map, Exhibit "A," shows the route of the proposed line(s), the side of the roadway to be occupied and the location and description, and ownership of all existing railroads, electric transmission, telephone, telegraph, signal, or other wire lines and/or airports, landing fields, or landing strips which have been approved and licensed by the Department of Aeronautics, as the same exist at this time which will or may be in conflict, crossed, paralleled by or contiguous to the proposed line. Exhibit "A" includes all irrigation systems that are or will be in operation at the time of construction of the proposed line(s), and it also includes any other structures, including wells, which merit safety consideration. Exhibit "A" shows line removals pertinent to this application. Exhibit "A" is identified as _____.
4. The specifications, "Exhibit "B," will govern the proposed electric line construction and are in sufficient detail as to reveal the type and manner of construction of the proposed line(s.) Said specifications meet or exceed the minimum requirements of Nebraska law and rules and regulations of the Nebraska Public Service Commission.
5. The owners of all presently existing railroads, electric transmission lines, telephone lines, telephone lines, signal lines, and other wire lines, along, across, or contiguous to the route of the proposed electric line have been notified of the proposed electric line construction and supplied with copies of the route map and specifications for the proposed line(s). Agreements with such owners of existing railroads, pipelines and wire lines, regarding the proposed electric line construction have been sought and will be supplied.

6. A copy of this application has been filed with the Nebraska Department of Aeronautics pursuant to the construction or alteration of any overhead wire, cable or pipeline, the height of which is greater than five feet above the elevation of an airport, landing field, or landing strip which has been approved and licensed by the Department of Aeronautics, for each 500 feet of distance that such construction is or will be situated from the nearest boundary of such airport, landing field, or landing strip.
7. The proposed electric transmission line(s) will be constructed to provide sufficient clearance between such line(s) and existing property constructed railroads, electric transmission lines, telephone lines, telegraph lines, signal lines, and other wire lines so that the reasonable safety, operation and efficiency of said existing lines will not be interfered with.
8. In the construction, operation, and maintenance of the proposed electric transmission line(s), the applicant will comply with the laws of Nebraska and the rules and regulations of the Nebraska Public Service Commission in conformance therewith.
9. Applicant informs the Commission that to the best of applicant's belief and knowledge, the only persons, firms, associations, or corporations owning existing railroads, electric transmission, telephone, telegraph, signal, or other wire lines and/or owning airports, landing fields, or landing strips which have been approved and licensed by the Department of Aeronautics, which will or may be affected by the construction and operation of the electric transmission line(s) proposed herein, are named in the following list and shown on Exhibit "A":

[List all parties]

WHEREFORE, the applicant prays that the Nebraska Public Service Commission will either after a public hearing or without a public hearing on this application as provided by law, issue an order authorizing the construction, operation and maintenance of the proposed electric transmission line(s) described and specified herein and by the attached exhibits.
